Professional Summary

Computer Science graduate with a strong foundation in programming, data structures, and algorithms. Proficient in building responsive web applications and designing user-friendly interfaces. Skilled in React.js, Redux, and web development, with a proven ability to deliver high-quality solutions in a fast-paced, collaborative environment. Passionate about creating impactful applications and continuously learning new technologies.

Education

Andhra University

B.Tech in Computer Science

Dec 2020 – May 2024

- CGPA: 8.98
- **Coursework:** Algorithms, Operating Systems, OOPs concepts, DBMS, Computer Networks

Technical Skills

- Programming Languages: Java, Python, C, HTML, CSS, JavaScript, SQL
- Libraries and Frameworks: React.js, Redux, Bootstrap, Express.js
- Databases: MySQL, MongoDB
- Design Tools: Figma
- Version Control: Git, GitHub

Experience

Associate Software Intern

Incture Technologies, Bhubanewar

Cupertino, CA

Jan 2024 – Aug 2024

- Contributed to the "Idea and Demand Management" platform, streamlining idea evaluation and demand planning processes, reducing project bottlenecks by 15%.
- Designed and implemented user-friendly interfaces, enhancing user experience and engagement by 25% using React.js and modern UI principles.
- Designed and implemented reusable components in React.js, optimizing development workflows and improving code maintainability, aligning with SDLC best practices.
- Collaborated with stakeholders and cross-functional teams, ensuring alignment with business requirements and project goals.
- Collaborated with cross-functional teams in an agile environment, achieving timely delivery of project milestones.

Projects

Blog Website with Headless CMS

github.com/meena/blog 

- Designed a blog platform using Headless CMS, allowing dynamic content updates without backend expertise.
- Improved page load speed by 30% through efficient API integration and caching strategies.

Personal Portfolio Website

github.com/meena/pf 

- Developed a responsive portfolio website using React.js and React Router, showcasing skills, projects, and achievements.
- Improved navigation and user engagement through dynamic routing and intuitive UI design, increasing recruiter interest by 40%.

Dynamic ToDO App

2002

Built a React-based task management app with local storage, enabling persistent data and real-time updates. Implemented CRUD operations with a user-friendly interface, improving task management efficiency for users.

Achievements

- **Web Developer Bootcamp (Udemy):** Completed a comprehensive course covering HTML, CSS, JavaScript, and MERN stack
- **Python Programming (HackerRank):** Earned a certification for proficiency in Python programming, including problem-solving and algorithm development.
- **Demonstrated** effective communication and collaboration while solving 300+ coding problems on GeeksforGeeks.
